

AMS WEBINAR

What's new - The use of testosterone in women

When: 6.30-7.30pm AEDT March 24 2021

The AMS Board is pleased to bring you this webinar on the use of testosterone therapy in women. This webinar is targeted at GPs, endocrinologists, gynaecologists, pharmacists and other healthcare professionals. This presentation will include a review of basic female androgen physiology, when it is appropriate to prescribe testosterone for women as well as how to prescribe testosterone for women. Case studies will be presented and there will be plenty of time for questions.

Speaker

**Professor Susan Davis,
MBBS, FRACP, PhD,
FAHMS, AO**

is an NHMRC Senior Principal Research Fellow, Director, Monash University Women's Health Research Program, Consultant Endocrinologist and Head, Specialist Women's Health Clinic for women with complex disease, Alfred Hospital Melbourne and consultant at Cabrini Medical Centre.

Her research has advanced the understanding of estrogen and testosterone action, deficiency and replacement in women. She is a past president of the Australasian Menopause Society and immediate past President of the International Menopause Society. She has over 420 peer-reviewed publications and has numerous awards.

Her contributions to endocrinology were recognized by the International Menopause Society Distinguished Service Award (2020), Endocrine Society of Australia Life Membership Award (2020), Endocrine Society of Australia Senior Plenary Award (2019) and the International Excellence in Endocrinology Laureate Award of the Endocrine Society USA (2015).

Moderator

**Dr Sonia Davison
MBBS FRACP PhD**

is the President of the AMS and was appointed to the AMS Board in February 2017.

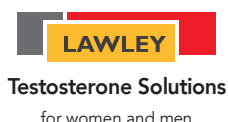

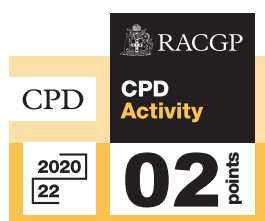

Dr Davison is an Endocrinologist with a special interest in Women's Health. She is a Clinical Fellow at Jean Hailes for Women's Health and has an adjunct appointment at the Women's Health Research Program, Monash University.

Sonia is in private practice in Victoria at Cabrini Medical Centre and at Jean Hailes for Women's Health. Her PhD and postdoctoral research examined sex steroid physiology in women, including measurement of androgens and their relationships with age, mood, sexual function and cognition.

Sonia was also editor of AMS's Changes magazine for nine years.
